Summary

Hi, my name is Indra Wahyu. I am interested in web programming. That's why I studied Web Development. I think programming is fun. I can experiment with existing algorithms and syntax so that it allows me to optimize code programs. Someone once said that working according to your passion/hobby can make you happier. And that's true.

I am a person who adheres to the rules, is disciplined, hardworking, and upholds the principle of "Attitude is Everything". I love socializing with new people and getting to know their habits, what they like, their backgrounds and how they build relationships with their peers. I think it's important because by getting to know other people better, I can build a stronger bond with that person.

Experience

Frontend Developer
Gurumerdeka
Feb 2022 - Present (1 year 4 months)

Study Group Artificial Intelligence Laboratory
Telkom University Artificial Intelligence Laboratory
Apr 2022 - Present (1 year 2 months)
